

End-to-End Transportation and Logistics for High-Value Shipments

One accountable partner for specialized transportation, warehousing, crating, rigging, and final mile delivery, with coordinated service from pickup through final placement.

High-value, fragile, or oversized equipment is vulnerable to vibration, damage, and delay. Relying on multiple vendors increases the risk of missed details and costly errors. One missed detail can disrupt a trade show, a facility project, or a critical production timeline.

Legacy Solves Transportation Challenges General Carriers Can't

Legacy supports complex, high-value shipments with:

- » **Specialized Fleet:** Flat-floor, high-cube, liftgate, and climate-controlled units.
- » **Custom Protection:** Custom crating solutions for sensitive equipment, with capabilities available through Legacy's San Jose and Chicago operations.
- » **White Glove Final Mile:** Inside delivery, final placement, rigging support, and debris removal.
- » **Nationwide Scale:** Access to 400+ warehousing and logistics locations through the UniGroup Logistics network.
- » **Accountability:** One dedicated point of contact coordinating your shipment from start to finish.

Built for High-Value, High-Stakes Industries

Legacy supports complex shipments across:

- » Healthcare & medical equipment, including imaging and diagnostic systems
- » Technology, including semiconductor equipment and data center hardware
- » Aerospace & aviation equipment
- » Trade shows & exhibits, coordinated around venue schedules, marshaling yards, and critical delivery windows

One accountable partner. Fewer handoffs. Clear communication.

LEGACY

How Legacy Protects Complex Shipments

Challenge	Legacy's Solution
✗ Fragile or vibration-sensitive equipment	✓ Specialized trailers and trained crews
✗ Oversized or non-standard equipment	✓ Custom crating, rigging support, and flatbed transport
✗ Tight, coordinated timelines	✓ One account manager owns routing and communication
✗ Multiple vendors and handoffs	✓ Transportation, warehousing, crating, rigging, and final mile delivery coordinated through one accountable partner
✗ Sensitive environmental needs	✓ Climate-controlled transportation, with climate-controlled storage available in Chicago

Our Process

1. Strategic Pre-Planning

We review shipment requirements, site access, permits, timing, and service coordination before pickup.

2. Custom Prep & Crating

Custom crating and protective preparation based on your equipment's size, weight, sensitivity, and transportation requirements.

3. Specialized Transport

Your shipment is transported using Legacy's specialized fleet and resources available through the UniGroup Logistics network.

4. White Glove Final Mile

Trained crews provide inside delivery, final placement, rigging support when needed, and debris removal.

5. Completion & Documentation

Final documentation and closeout communication confirm completion and address any remaining details.

Why Legacy?

For 35 years, Legacy has helped clients protect high-value equipment, critical timelines, and their reputations through specialized transportation and logistics expertise.

Let's plan your next shipment together.
